

Front-End Developer

About FalconAI:

FalconAI is a VC backed start-up developing cutting-edge AI algorithms. Based on novel artificial intelligence & machine learning technologies, the company plans to deploy a series of disruptive applications in various sectors. FalconAI Team is comprised of top AI researchers and engineers located in Boston and Istanbul. The company is seeking passionate, talented, motivated and hard-working individuals to join our Istanbul office as a Front-end Engineer to invent the next generation of AI algorithms.

At FalconAI, you will be:

- Working as at least 1 day at our Istanbul office and remotely for the remaining days of the week
- Prototyping, developing and deploying web applications of AI platforms
- Working with UI/UX designers and translating wireframes into products
- Creating interfaces and graphical representations of statistical data

We're excited about you because you have:

- Bachelor of Science degree or above in Computer Science/Engineering or related technical fields
- Advanced knowledge of HTML and CSS
- Professional expertise with at least one of the standard Javascript frameworks, e.g. React, Vue, Angular
- Ability to quickly learn and use new front-end libraries
- Experience in clearly and effectively communicating your ideas and progress (both verbal and written)
- Familiarity with MOBA type video games, specifically “Dota 2” and “League of Legends” is a plus
- Familiarity with AWS, GNU/Linux, and shell scripting is a plus

You will love working at FalconAI because:

- You will be one of the pioneers who develop the next generation of AI platforms
- You will be an integral part of fast growing international team
- You will expand your knowledge in front-end development
- Your performance will not be evaluated based on your working hours but your delivery

Please send your application attached with your CV to info@falconai.tech
